

Summit Fence South, Inc

When Quality Matters...

EXTEND THE LIFE

You invested well in your new fence and now is the time to protect your investment. The elements along the gulf coast wreak havoc on exposed cedar fences. By staining and sealing the pickets you can protect the wood from the moisture that rots and the insects that accelerate the decaying process.

Summit Fence South, Inc. now offers the option to stain your fence. Our professional crews can quickly stain your existing fence with one of four Sherwin-Williams® semi-transparent exterior house stains. This product is water based, resists fading and hazing, has excellent penetration and is mildew resistant.

SUMMIT FENCE SOUTH, INC.

Recommends Staining Your Fence...
